Professional Summary

Highly experienced and results-driven **Frontend Engineer** with **5+ years** of hands-on experience in **ReactJS and TypeScript**, specializing in building scalable, user-centric web applications. Proven ability to deliver high-impact features, optimize user experiences, and significantly enhance development efficiency through contributions to Design Systems and robust testing strategies (Jest, React Testing Library, Cypress, Playwright). Possesses a solid understanding of backend technologies (NodeJS, PHP) and full-stack development principles, adept at partnering with cross-functional teams to ensure seamless integration and timely project delivery, consistently contributing to improved application performance and user engagement. Demonstrates expertise in large-scale data visualization and handling, enabling intuitive access to complex datasets.

Technical Skills & Languages

- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, ReactJS, React Native, NextJS, NodeJS, HTML5, CSS3
- **Frontend Frameworks/Libraries:** ReactJS, React Native, NextJS, Material UI, ShadCN, Tanstack
- **Testing & QA:** Jest, React Testing Library, Cypress, Playwright
- **Tools & Platforms:** Git, Webpack, Vite, CI/CD Pipelines, RESTful APIs, UI/UX Collaboration (Figma), Responsive Design, Debugging & Troubleshooting, Jira
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Concepts:** Design Systems, Software Architecture, Data Visualization, Large-scale Data Virtualization/Handling
- **Backend (supporting):** NodeJS, PHP, Laravel, C#
- **Languages:** English (Intermediate), Portuguese (Native)

Professional Experience

BigDataCorp | Rio de Janeiro, RJ, Brazil

Frontend Developer | June 2023 – Present

- Instrumental in transforming complex, API-only data access into an intuitive, user-friendly Big Data platform, significantly improving usability for operational users without technical knowledge.
- Led the development of key account management features, notably enhancing user control over configurations and overall product utilization, which inherently reduced support inquiries.
- Contributed to a substantial improvement in the sales team's ability to market data products effectively by developing compelling visual showcases, streamlining client demonstrations and support.
- Involved in the full software development lifecycle, from architectural design to implementation, ensuring the integrity and scalability of both frontend and selected backend components (NodeJS, C#).
- Guaranteed application reliability and a smoother user journey by implementing comprehensive end-to-end testing with Cypress, ensuring high-quality and stable releases.
- Collaborated closely with product owners and cross-functional teams to translate complex business requirements into tangible and impactful software solutions.

Vindi | São Paulo, SP, Brazil

Frontend Developer | November 2020 – April 2023

- Played a pivotal role in shaping the user experience of critical payments and account management platforms, developing and optimizing core features for client-facing and employee-facing interfaces.
- Instrumental in establishing a robust Design System and implementing comprehensive unit testing strategies, collectively enhancing development efficiency and ensuring the delivery of high-quality, reliable software.
- Collaborated closely with UI/UX designers within the Design System team to develop and maintain a reusable UI component library in ReactJS and TypeScript, which substantially streamlined development workflows across various projects.
- Spearheaded comprehensive unit testing strategies using Jest and React Testing Library, ensuring high code quality and application reliability, leading to a noticeable decrease in production bugs and enhanced overall performance.
- Actively participated in Agile methodologies, including Kanban workflows and Scrum ceremonies (Planning, Daily, Retrospective), fostering a collaborative and efficient team environment.

Eficaz Marketing | Marília, SP, Brazil

Full-Stack Developer | February 2020 – November 2020

- Operated as a Full-Stack Developer within a dynamic software house, dedicated to crafting bespoke web applications for a diverse client portfolio.

- Engaged directly with clients to understand complex challenges, translating their pain points and requirements into effective, customized software solutions.
- Managed the full development lifecycle of client projects, from initial concept to successful deployment, ensuring adherence to client specifications and strict timelines.
- Leveraged a versatile tech stack including PHP, ReactJS, and NodeJS to build robust and scalable web applications tailored to unique business needs.
- Cultivated strong, trust-based relationships with clients through consistent alignment meetings, regular follow-ups, and dedicated daily support, enhancing client satisfaction and identifying opportunities for repeat business.

Cuca Fresca LTDA | Marília, SP, Brazil

Full-Stack Developer | April 2019 – February 2020

- Played a key role in a full-stack development team, responsible for building and maintaining a real-time customer service application designed to support customer interactions and sales operations.
- Contributed to the enhancement of software sales and the delivery of personalized customer support by developing intuitive and efficient system functionalities, directly impacting user satisfaction and engagement.
- Developed core components of the customer service platform using AngularJS for the frontend and NodeJS with PostgreSQL for the backend, ensuring a robust and user-friendly experience.
- Integrated WebSocket functionality using the socket.io library to facilitate seamless, real-time communication between customer representatives and end-users, significantly improving issue resolution.
- Designed and implemented interactive features and a responsive interface that served as a dynamic communication bridge, enhancing the overall customer interaction.
- Collaborated closely within an agile environment, ensuring effective communication and integration across development phases.

Vooxer | Marília, SP, Brazil

Intern Full-Stack Developer | July 2018 – April 2019

- Marked official entry into software development, gaining hands-on experience in building web systems for various clients within a dynamic startup environment.
- Developed full-stack solutions, contributing to both backend and frontend components of web applications, laying the foundation for a comprehensive understanding of software architecture.
- Collaborated with cross-functional teams to translate client requirements into functional systems, ensuring alignment with project goals and timely delivery.

- Actively participated in the entire development lifecycle, from initial coding to testing and deployment, fostering a solid understanding of agile practices.

Education

Unimar | Marília, SP, Brazil

Associate's Degree in Analysis and Systems Development | 2020
